

People Move. Networks Must Follow.™

Aruba Networks securely delivers networks to users, wherever they work or roam. Our high performance unified mobility solutions are massively scalable, easy to implement, simple to manage, and feature over-the-network diagnostics and software updates. By integrating self-optimizing Wi-Fi networks, identity-based security, remote access and cellular solutions, and multi-vendor network management services, our solutions enable the Follow-Me Enterprise:

- **Follow-Me Connectivity:** Adaptive 802.11a/b/g/n Wi-Fi networks optimize themselves to ensure that users are always within reach of mission-critical information;
- **Follow-Me Security:** Identity-based security assigns access policies to users, enforcing those policies whenever and wherever a network is accessed;
- **Follow-Me Applications:** Remote access solutions and cellular network integration ensure uninterrupted access to applications as users move;
- **Follow-Me Management:** Multi-vendor network management provides a single point of control while managing both legacy and new wireless networks from both Aruba and its competitors.

The business drivers and application requirements for mobility vary considerably across vertical markets. These disparate needs require a dedicated focus on each industry to serve the unique complexities and nuances that exist. Aruba offers targeted products, features and technology partnerships that provide focused solutions for vertical markets.

Across all of these markets, Aruba delivers a comprehensive mobility solution that serves applications including wireless LAN access, secure enterprise mesh, remote access, wireless intrusion protection, network access control, voice over Wi-Fi and fixed-mobile convergence, video surveillance, real-time location services, and many more.

Why Aruba?

- Deployed in some of the world's largest networks by the most demanding customers
- Industry-leading security, access control and IDS features
- Peerless performance and scalability
- Easily supports new services and applications such as VoIP
- "Right-sized" cost-effective solutions for any size deployment
- Unified, centralized multi-vendor wireless network management

Key Industries

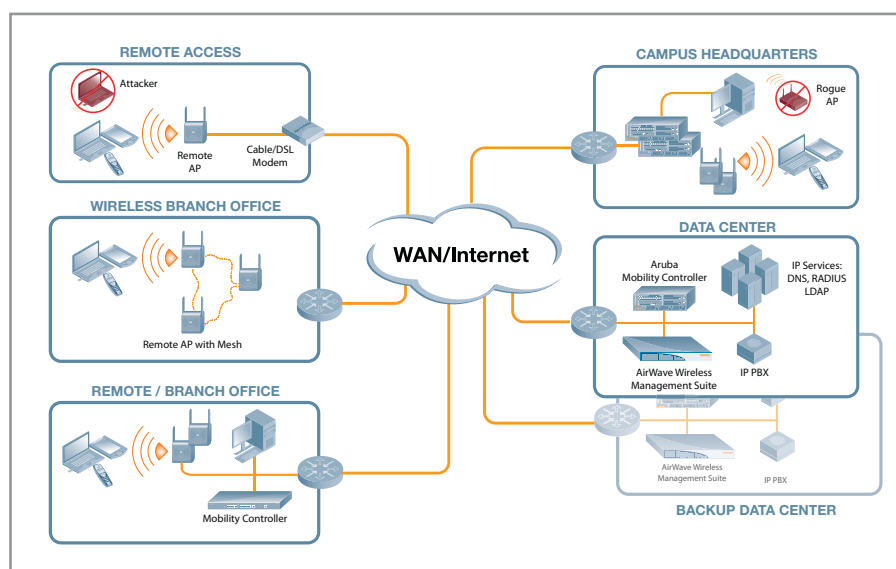

Aruba Differentiators

The Aruba Networks System Solution

Aruba has integrated all of the elements required to deliver enterprise mobility—security, application, network and radio frequency (RF) management services—into a unified solution. The components of this solution include an award-winning portfolio of wireless LAN, security, diagnostic, network management, and integration products backed by a worldwide support and training organization. Components include:

- Aruba Mobility Controllers for flexible, high-performance support of the ArubaOS operating system and software modules
- Aruba Access Points and Access Concentrators that provide wireless and wireline access to Aruba Mobility Controllers
- ArubaOS operating system for delivering user-centric enterprise mobility
- ArubaOS software modules for value-added security and mobility features including mesh networking, wireless intrusion detection, policy enforcement firewall and remote access
- Aruba Endpoint Compliance System for Network Access Control
- AirWave Wireless Management Suite from Aruba for centralized management

Best, most reliable wireless LANs

- Automatically optimize network performance for best results at all times

Upgradeable design

- Modular hardware and software design lowers CAPEX
- Ladder-free updates and upgrades over the network reduces OPEX

Built-in security

- Identity-based access control enforced for all users at all times
- Security meets DoD / PCI / HIPAA requirements

Simple deployment and maintenance

- Interoperable with existing networking gear – no forklifts needed

Easy to manage

- Centralized management, remote reconfiguration lowers IT overhead

Highly flexible, massively scalable design

- WLAN, remote access, wired and wireless guest access, enterprise mesh, cellular+Wi-Fi (FMC), wired security, NAC
- Scalable from SOHO on up

Aruba Technology Alliance Solutions

The Aruba Technology Alliance Program provides validated multi-vendor solutions in key technology areas such as Voice-over-Wi-Fi, asset tracking and location services, video surveillance, multimedia classrooms, and more. Representative partners include:

- Aeroscout
- AirMagnet
- Avaya
- Dräger
- Ekahau
- InnerWireless
- Juniper
- Microsoft
- Milestone
- Polycom
- Riverbed
- Vocera
- Wavelink
- Welch Allyn
- Wildpackets
- Wren

About Aruba Networks

Aruba is the world's second largest supplier of enterprise wireless LANs, and the premiere provider of identity-based security, client-free remote access solutions, and multi-vendor network management systems. The cost, convenience, and security benefits of our unified mobility solutions are fundamentally changing how and where we work. Listed on the NASDAQ and Russell 2000® Index, Aruba is based in Sunnyvale, California and has offices worldwide. To learn more, visit Aruba at www.arubanetworks.com.
